INTRODUCTORY.

WE manufacture a wide variety of Iron Railings, Entrance Gates and Wire Fences, and show in this booklet a few of our most practical designs. We have every facility for economical production, and we are prepared to install our work complete in any part of the country.

A complete line for Private Estate work.—Fences for Pasture, Paddock, Garden, Lawn, Poultry Run, Dog Kennel, Tennis Court, Game Preserve, etc.

Also Fences for Cottages, Factories, Parks, Cemeteries, Churches, School and other Public Buildings.

A Fence for every purpose.

AS TO PRICES.

L IST prices are always misleading and in our particular line, where orders for Fence vary from twenty feet to one mile or more in length and where the work is to be erected at points from five miles to several hundred miles distant, it is impossible to establish a fixed basis for intelligent figures. We have, therefore, omitted all prices from this catalogue.

Let us know the style of Fence you desire to purchase, state height wanted and send us a rough pencil diagram of plot to be enclosed, giving measurements, location and width of gates, together with ***full particulars***, and the ***right figure*** for the ***right sort of work*** will be forwarded to you by return mail. If there are any heavy grades, terraces, rock, or other unusual conditions to be encountered, be sure to mention them and avoid misunderstanding and delay. If not too far distant, a postal card or the telephone will bring a representative to you at your convenience.

PLATE No. 5740.—Entrance Gates and Railing, designed and erected by us for
Highland Cemetery, Ypsilanti, Mich.

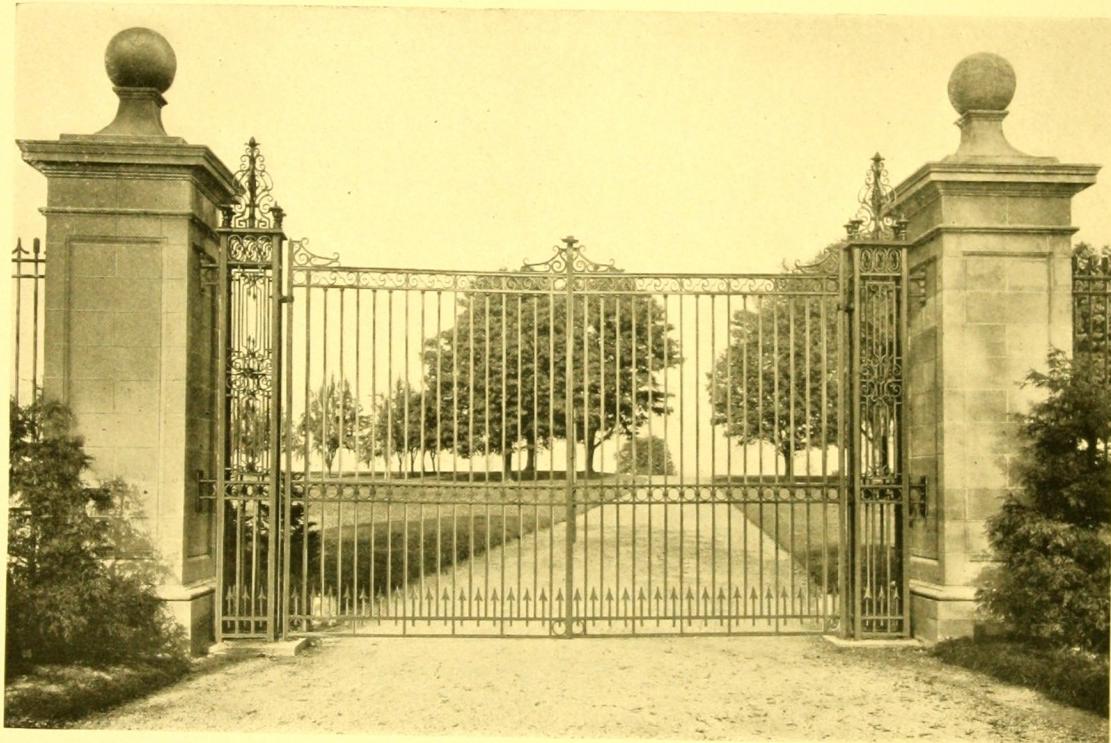

PLATE No. 5726.—Entrance Gate and Railing furnished by us for the Estate of
Henry Steers, Esq., Portchester, N. Y.

PLATE No. 5747.—Showing a few of our popular stock designs of light Iron Railing.

Furnished three feet, three feet six inches and four feet high, with gates to match.

WIRE FENCES.

ON the following pages we show a few of our best designs of Wire Fences; Fences that are thoroughly well made, substantial, reliable and durable; Fences that will give the best of satisfaction.

For all our Wire Fences we use Posts that are about twice as thick and twice as heavy as those used by other manufacturers. We furnish them black (painted), or heavily galvanized by the hot process after fabrication.

Our Anchors for Wire Fence Posts are designed to give the posts a broad and substantial bearing near the surface of the ground and where it is most needed. They are as rigid and frost-proof as the roots of a tree.

For Fences up to four and one-half feet high, with the exception of Pasture Fence, posts should be spaced seven feet apart. Above this height, where heavier construction is used, the proper spacing is eight feet.

For durability, and to lessen the cost of maintenance, we recommend the use of galvanized posts and galvanized top rail.

Plans showing every detail of construction of any of the Wire Fences illustrated in this catalogue will be furnished upon request.

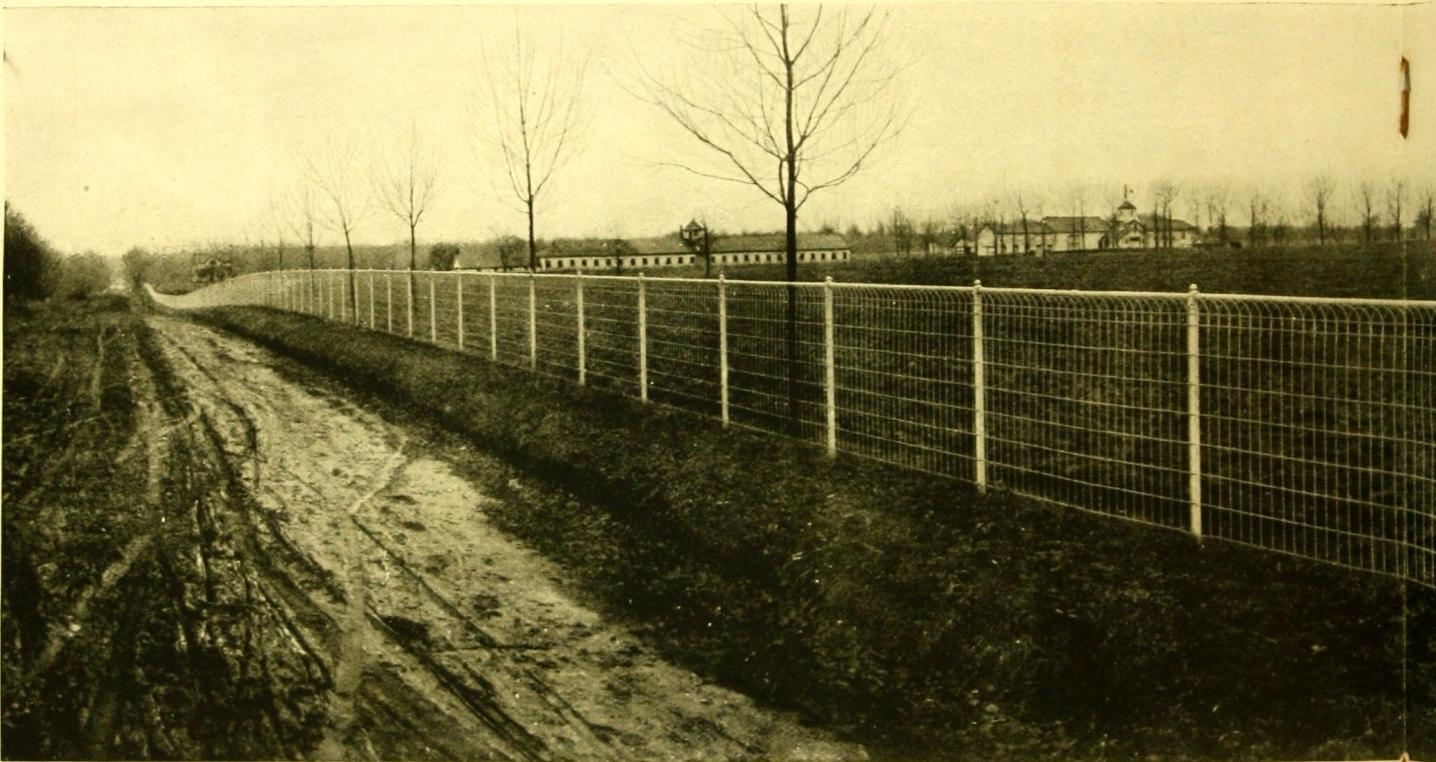

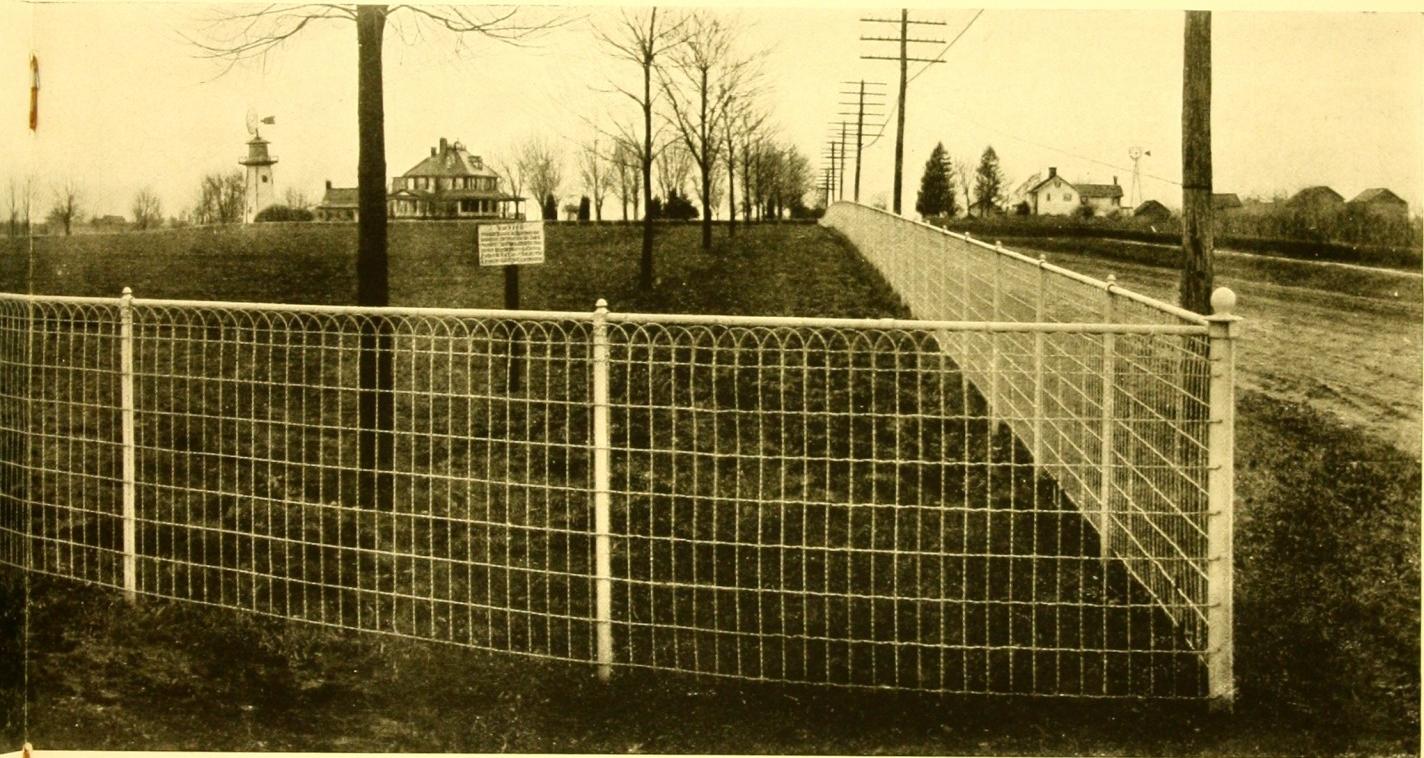

PLATE No. 5748.—STYLE "C" FENCE. The above photograph was taken at Caleb Farms, Gideon N. Caleb, Esq., Proprietor, Eatontown, N. J., where we have erected about three miles of this style of Fence fifty inches high, using all galvanized construction and all painted white. A very serviceable and economical Fence for private estates. Can be furnished three feet, three and one-half feet, four feet and four and

one-half feet high. All horizontal cables, which are made from two strands of number twelve galvanized wire, are spaced six inches apart, except the two top cables, which are two and one-half inches apart. The vertical pickets are made from number nine, crimped, galvanized wire spaced two and seven-eights, two and one-quarter and one and three-eighths inches apart.

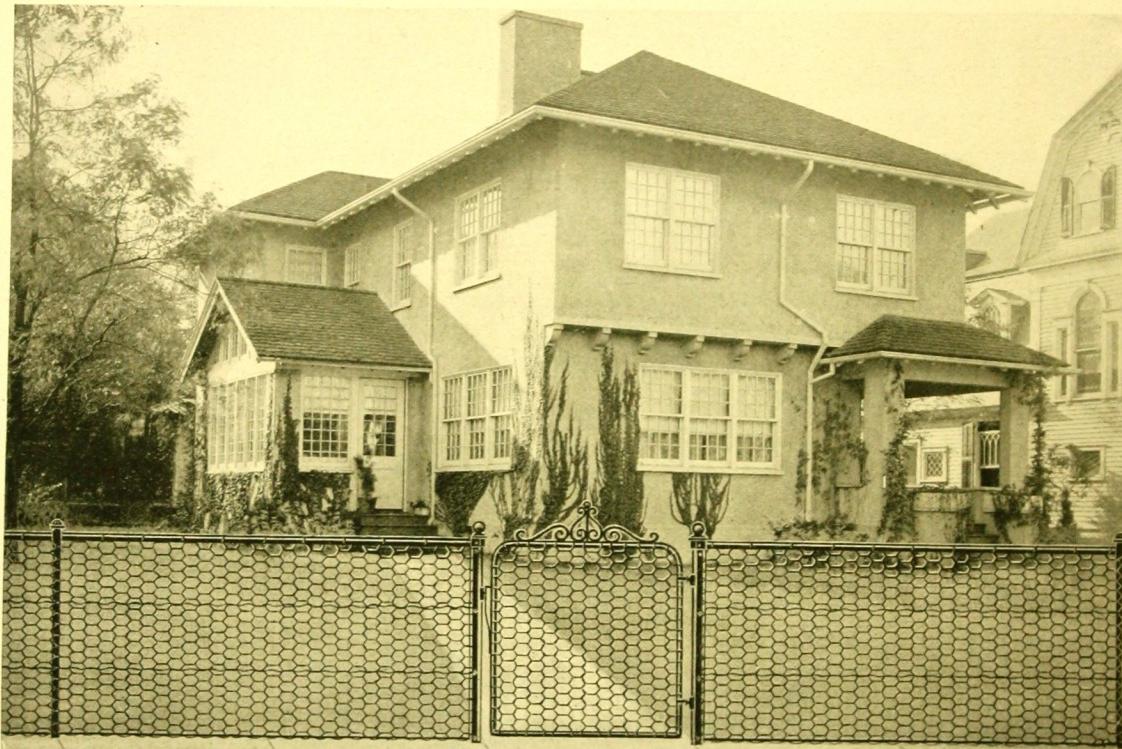

PLATE No. 5749.—STANDARD LAWN FENCE. This is the strongest and most durable Light Fence manufactured, and affords the greatest possible protection to the enclosed grounds. Very popular for suburban cottages, gardens, etc.
Can be furnished thirty-eight, forty-four and fifty inches high.

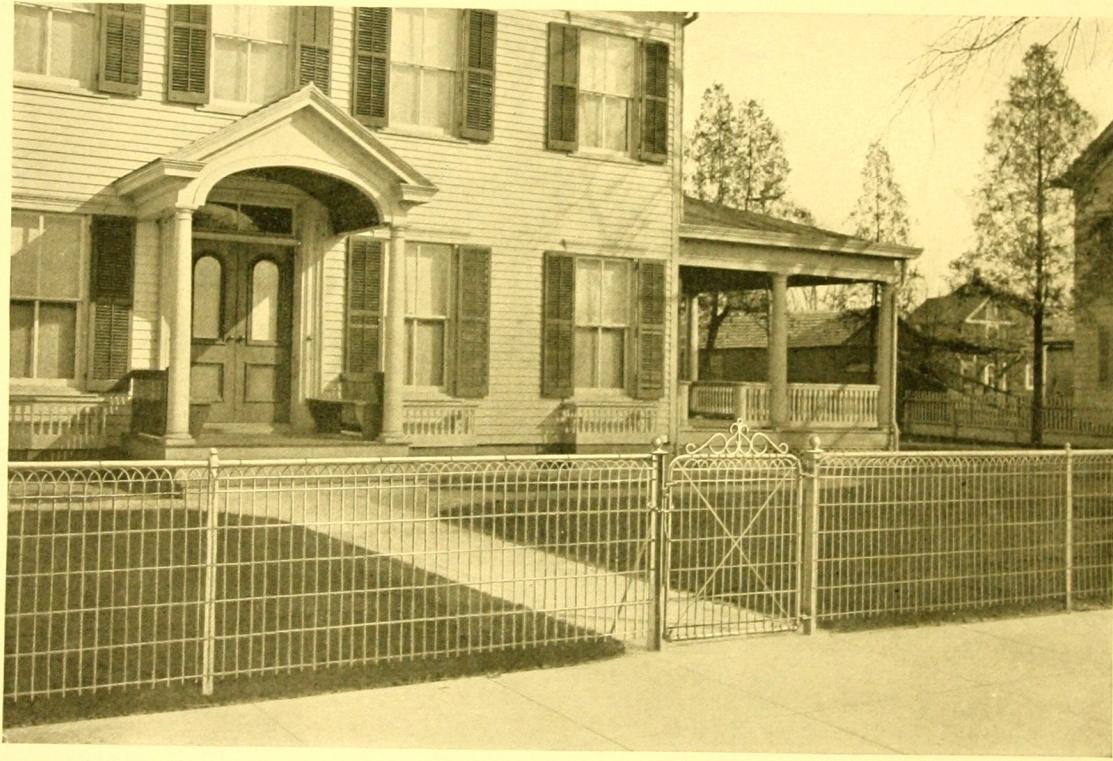

PLATE No. 5750.—STYLE "C" FENCE erected for Mrs. R. A. Pitcher at Patchogue, Long Island.
An ornamental and durable Fence for lawns and gardens. Same specification as on pages twenty and twenty-one.
Can be furnished thirty-eight, forty-four or fifty inches high.

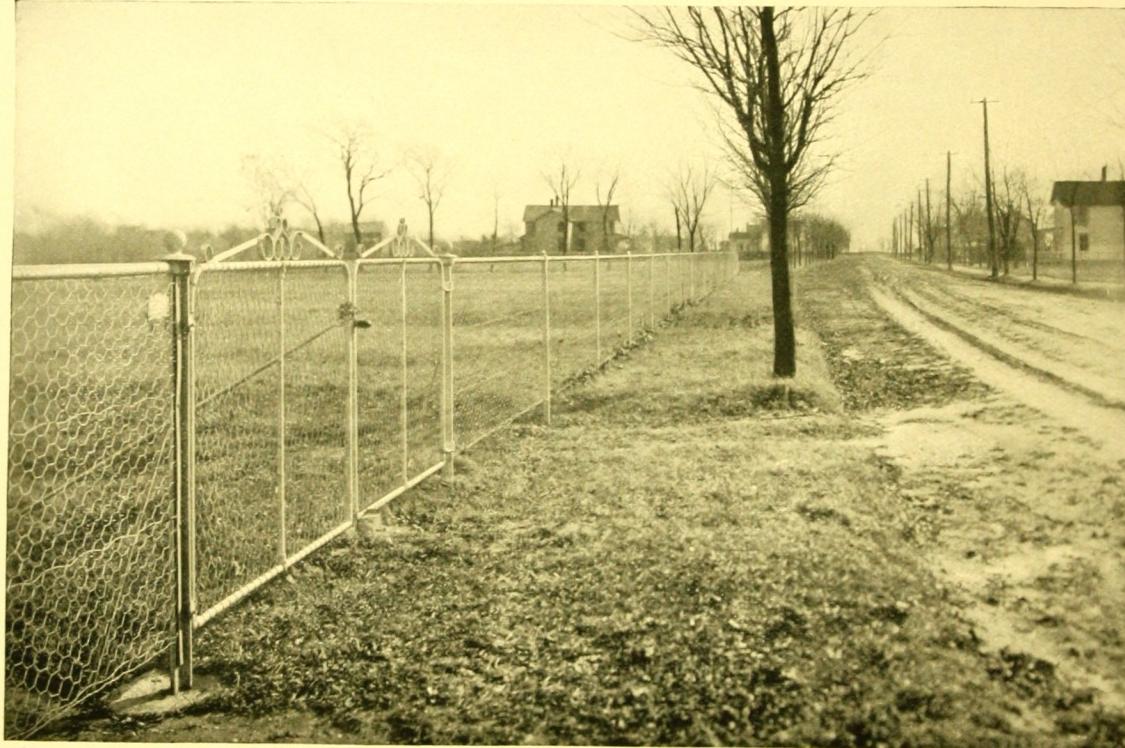

PLATE No. 5751.—STANDARD LAWN FENCE as used on large estates. Photograph taken on the property of Mrs. Phoebe A. D. Boyle at Patchogue, Long Island, where we erected a little more than one mile of this Fence fifty inches high.

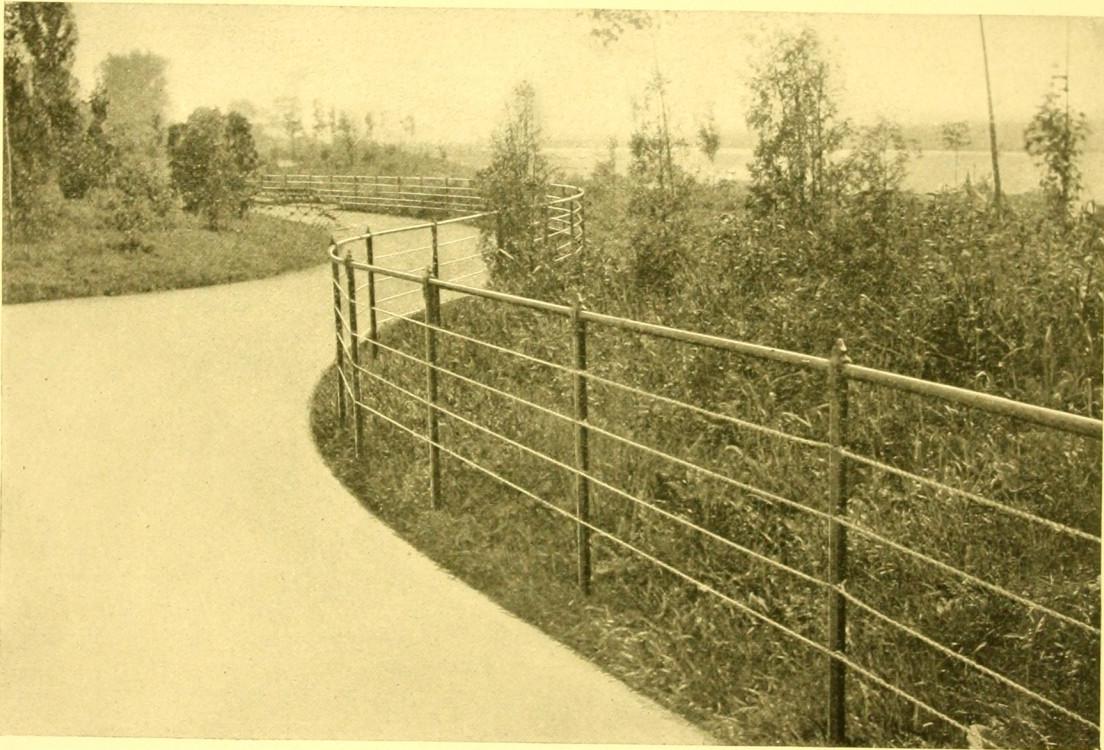

PLATE No. 5752.—STYLE "A" LAWN FENCE. Photograph taken in Riverside Park, New York City. A very neat and substantial Wire Fence with pipe rail at top. Can be furnished thirty-eight, forty-four or fifty inches high.

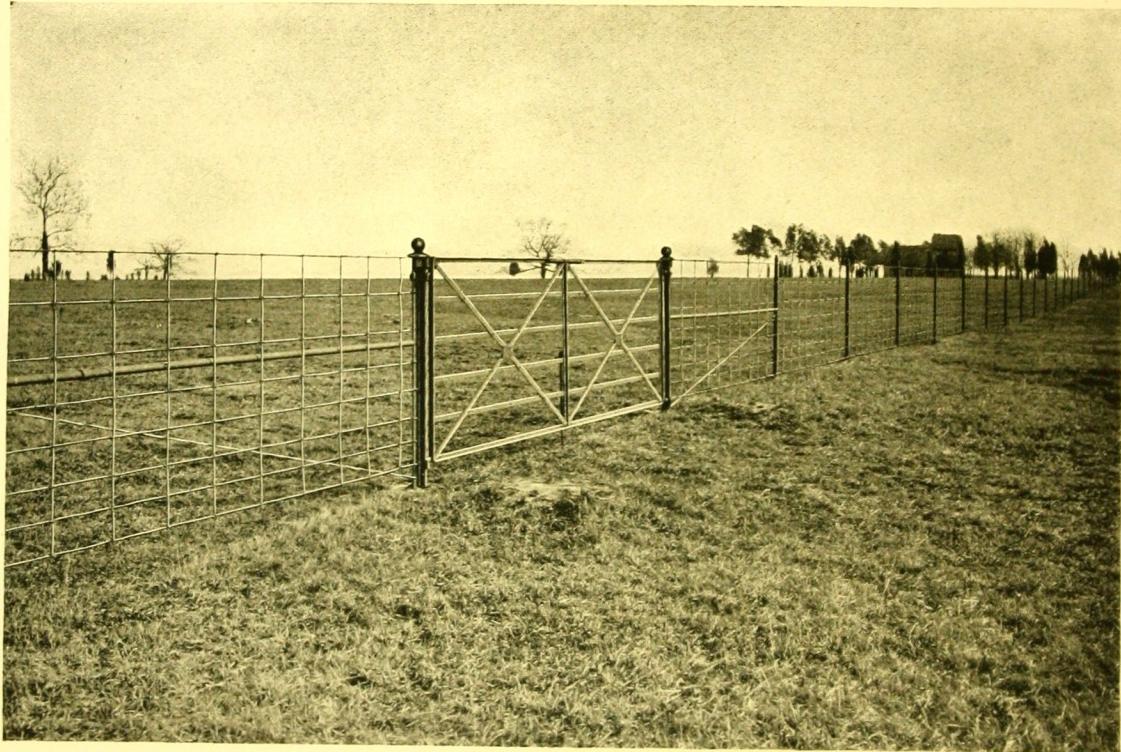

PLATE No. 5753.—STYLE G-12 FIELD AND PASTURE FENCE. Popular height four feet and two inches.

Fabric made from number nine galvanized wire with vertical stays spaced six inches or twelve inches apart.
Photograph taken on the Estate of Jacob H. Schiff, Esq., at Rumson, N. J., where we erected about three miles of this Fence.

PLATE No. 5754.—UNCLIMBABLE GARDEN FENCE. A heavy Wire Mesh Fence five feet high, including barb wire over-hang.
Photo taken at Steinway & Sons factory, Long Island City, N. Y., where we have installed several thousand feet of this design.

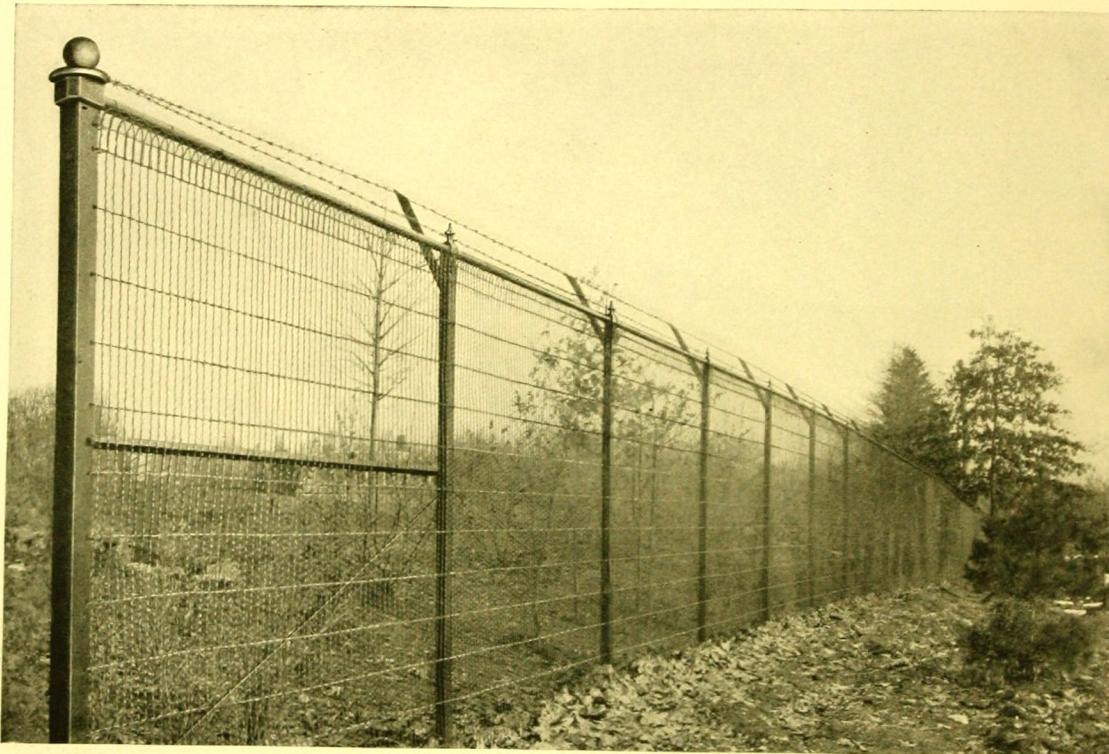

PLATE No. 5755.—UNCLIMBABLE "C" FENCE erected on the property of R. M. Harding, Esq., at Montclair, N. J.
Can be furnished any height, with fabric as specified on pages twenty and twenty-one.

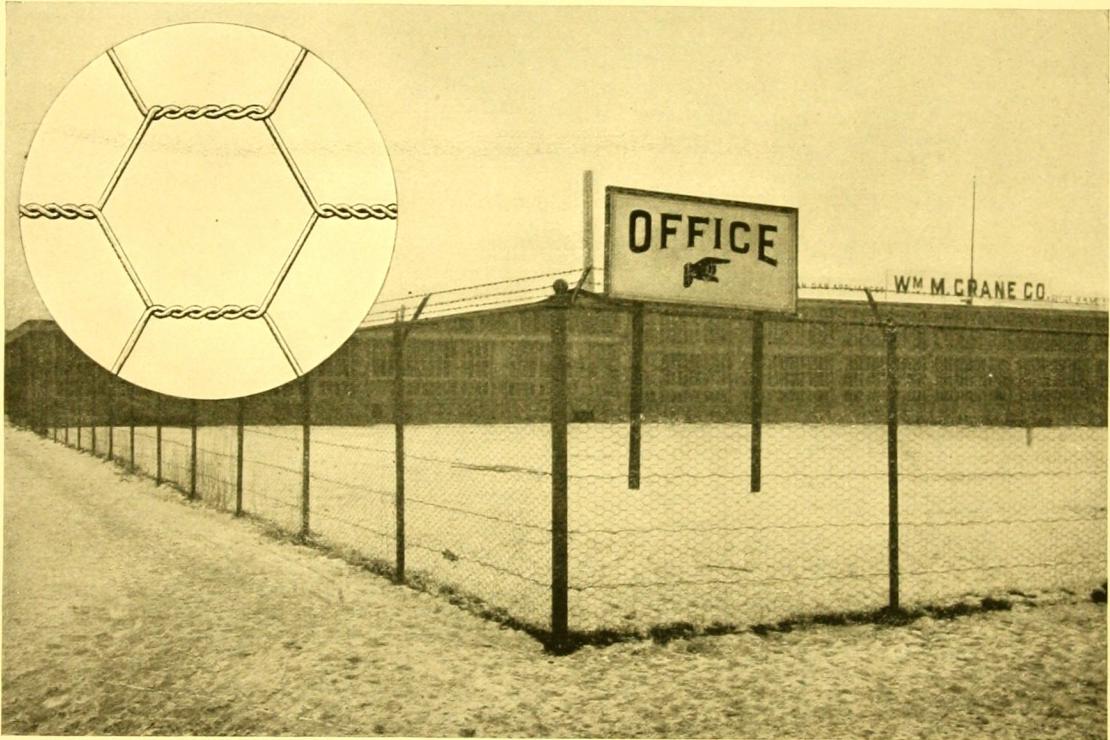

PLATE No. 5756.—UNCLIMBABLE WIRE MESH FENCE erected around the William M. Crane Co. plant at Jersey City, N. J.
A substantial and durable Fence for Factories or Estate Boundaries. Can be furnished from five feet to eleven feet high.
Insert shows one-half size of wire and mesh.

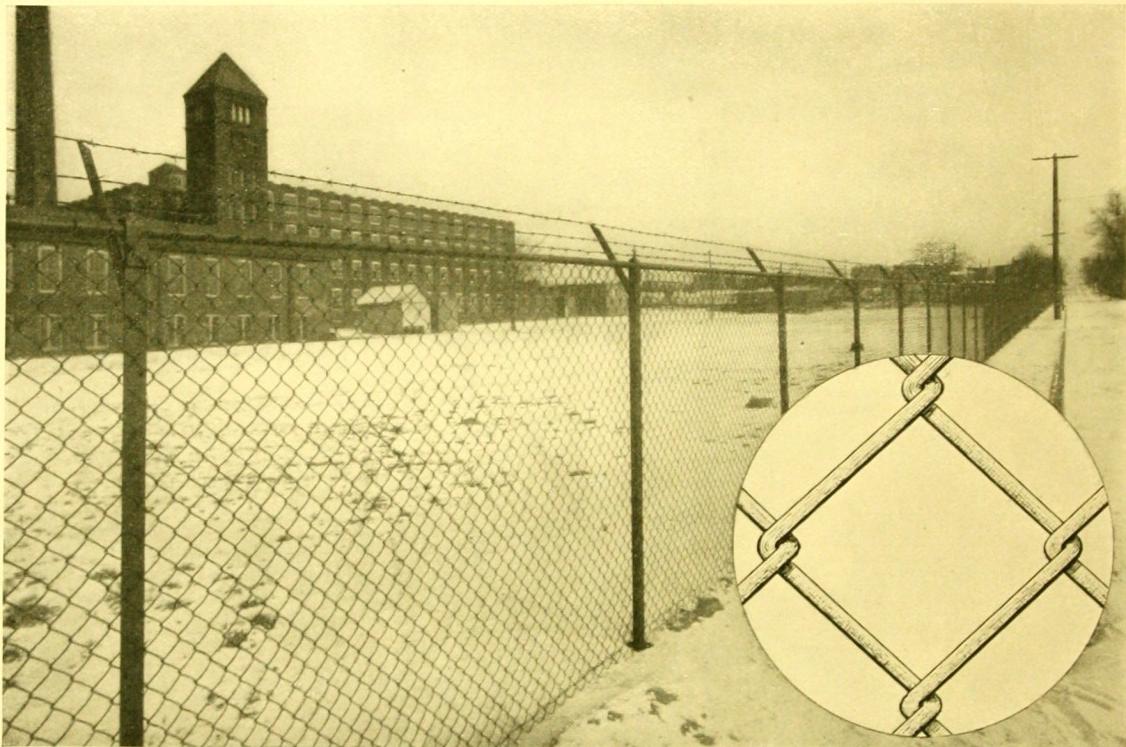

PLATE No. 5757.—UNCLIMBABLE CHAIN LINK FENCE erected around the James Chadwick & Bro. Ltd. plant at Jersey City, New Jersey. No better protection made for Industrial properties. Insert shows one-half size of wire and mesh. Write for specifications and prices.

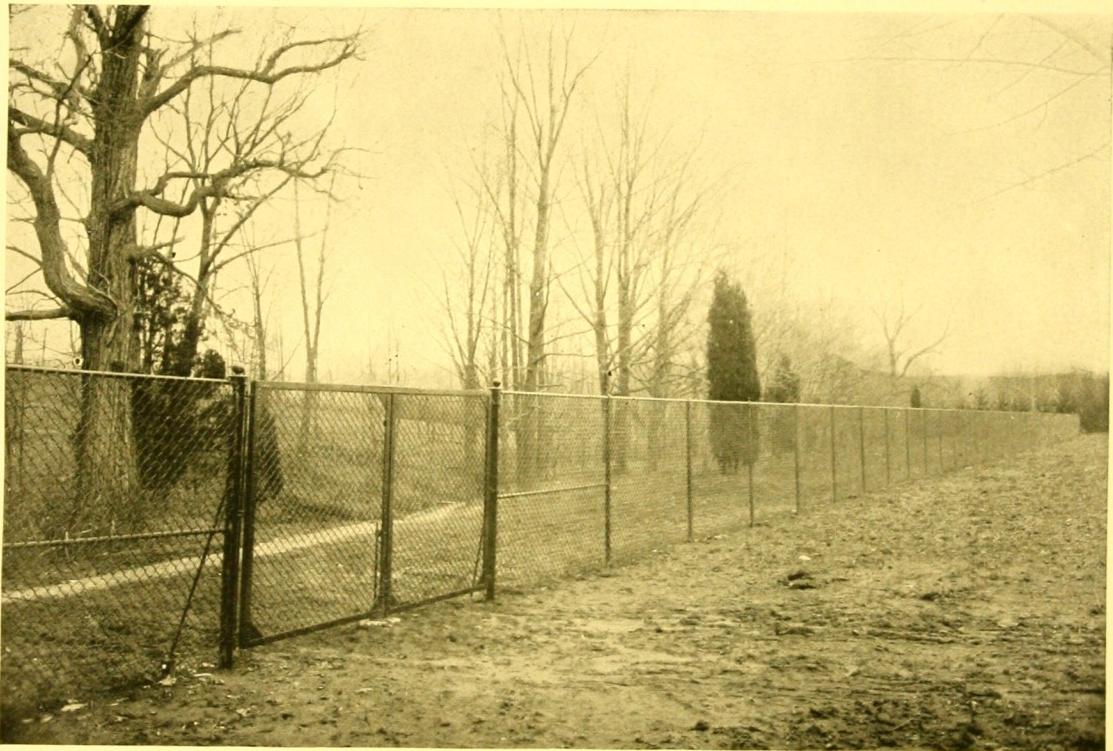

PLATE No. 5758.—CHAIN LINK FENCE without barb wire over-hang. A very desirable Fence for Estate Boundaries.
Photo taken on the Estate of William H. English, Esq., at Middletown, New Jersey, where we have erected several thousand feet of this type from four and one-half feet to eighteen feet high.

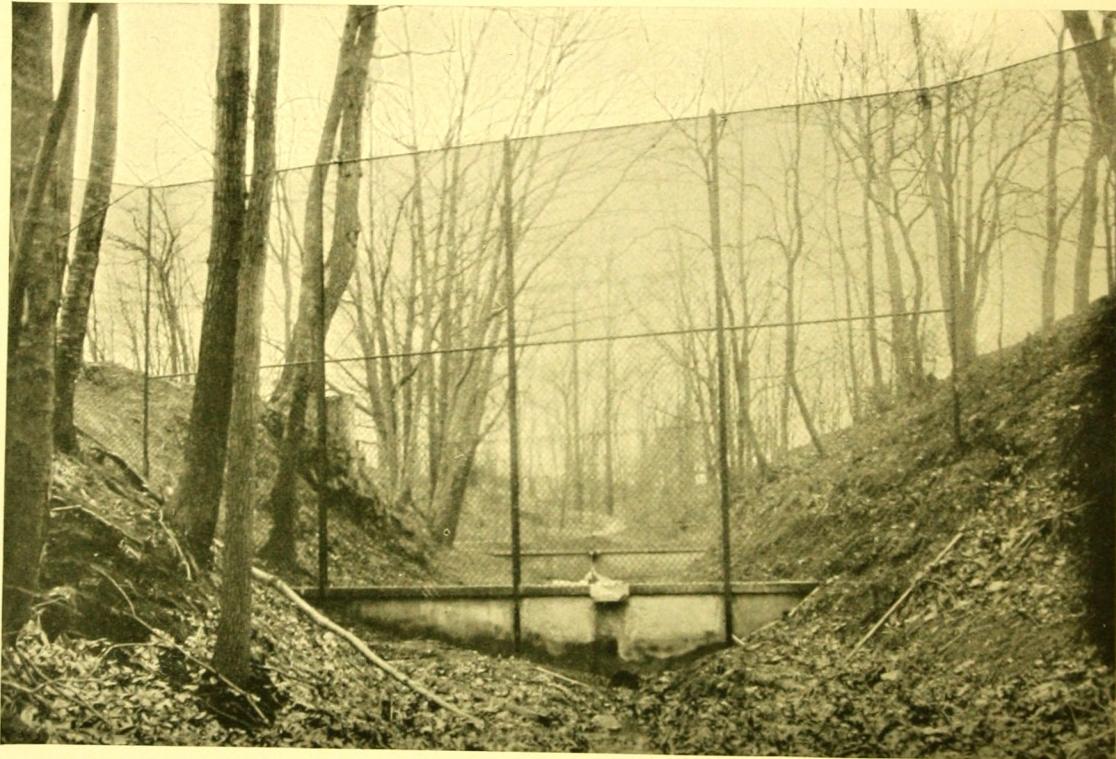

PLATE No. 5759.—CHAIN LINK FENCE eighteen feet high, running through ravine on the property of William H. English, Esq., Middletown, New Jersey. No proposition too difficult for us to handle.

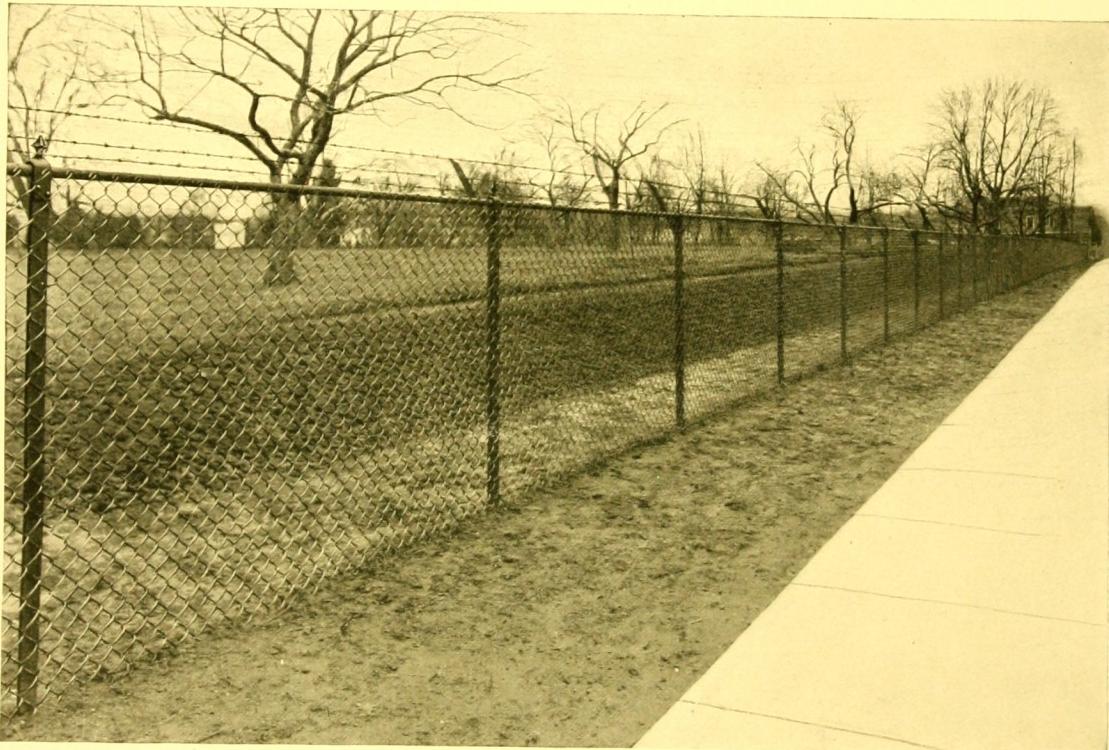

PLATE No. 5760.—UNCLIMBABLE CHAIN LINK FENCE erected on the property of Miss Elizabeth Gray, Garwood, New Jersey,
Very desirable where the greatest possible protection is required.

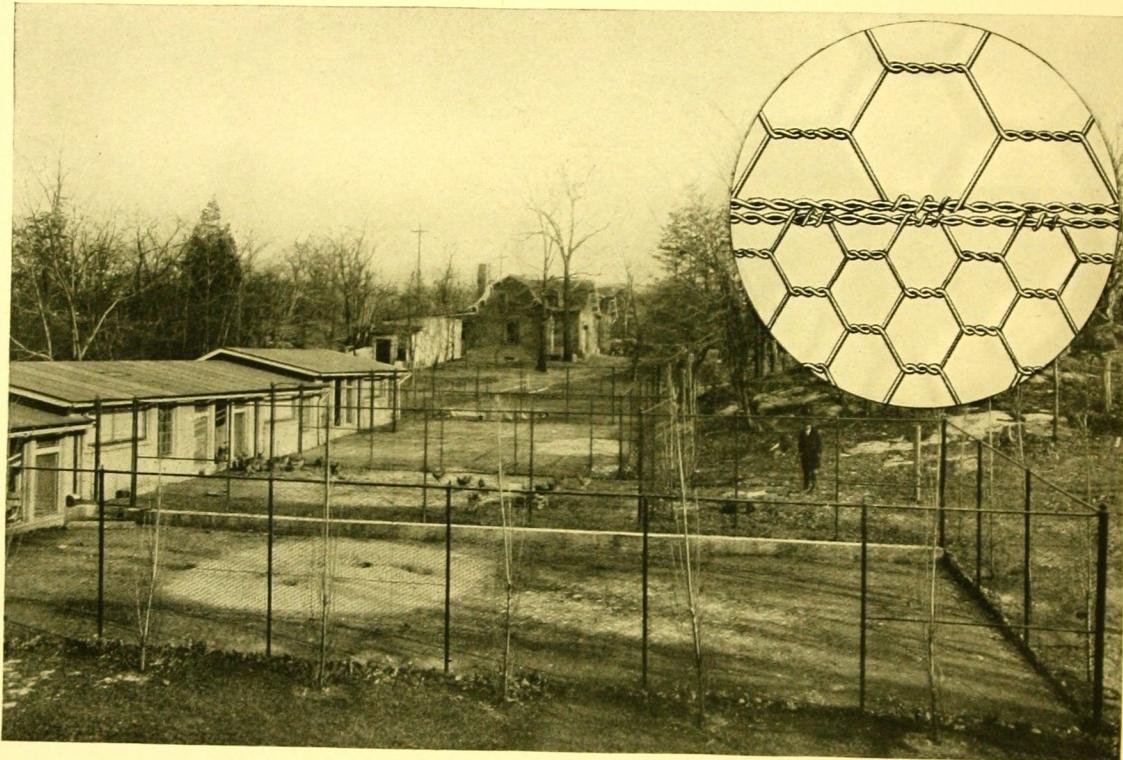

PLATE No. 5761.—POULTRY RUN FENCES erected on the property of George W. Perkins, Esq., at Riverdale, New York City.
We make a specialty of Fence for Poultry Yards and Dog Kennels. Insert shows one-third size of wires and meshes.

PLATE No. 5762.—TENNIS COURT FENCE erected on the property of Leopold Stern, Esq., at Elberon, N. J. Can be furnished eight feet and ten feet high. Our Tennis Fence construction has no equal so far as strength and durability are concerned, and has been adopted by a great majority of the leading Country and Tennis Clubs, as well as private owners.
Write for specifications, prices and complete list of references.

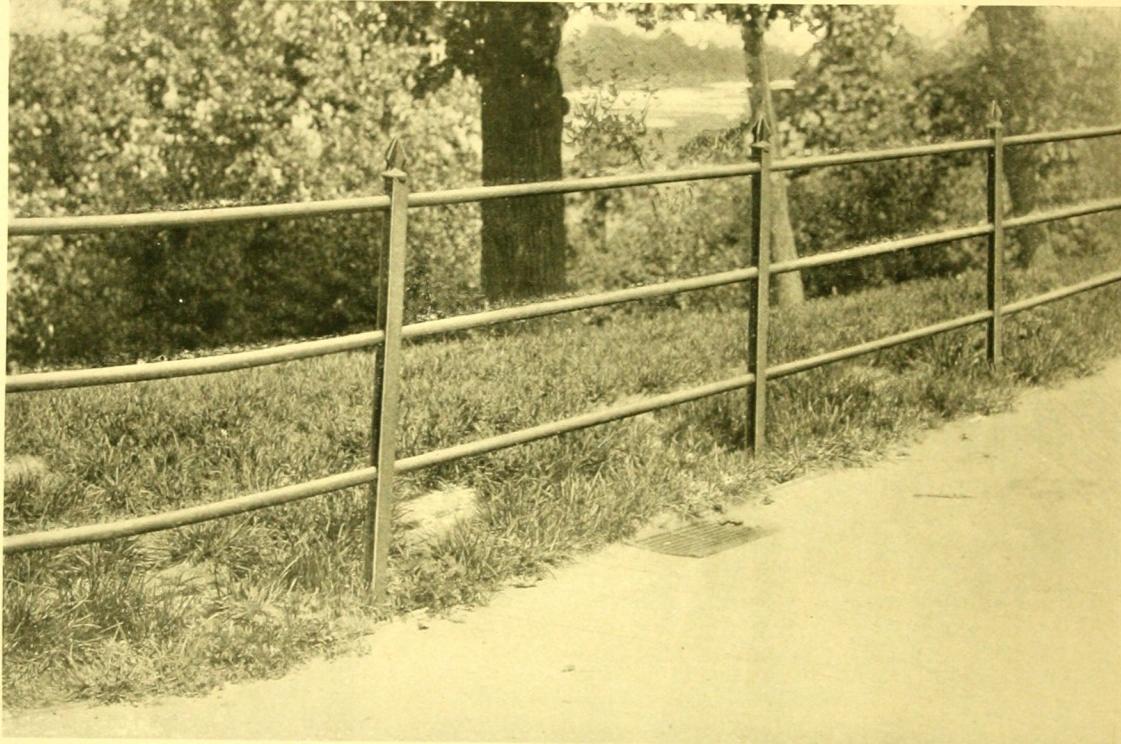

PLATE No. 5763.—PIPE RAILING erected in Riverside Park. We have furnished and erected many miles
of this Railing for the Department of Parks, New York City.

PLATE No. 5764.—PIPE RAILING furnished and erected by us on the Board Walk at Atlantic City, New Jersey.

We make a specialty of Pipe Work in all its branches.

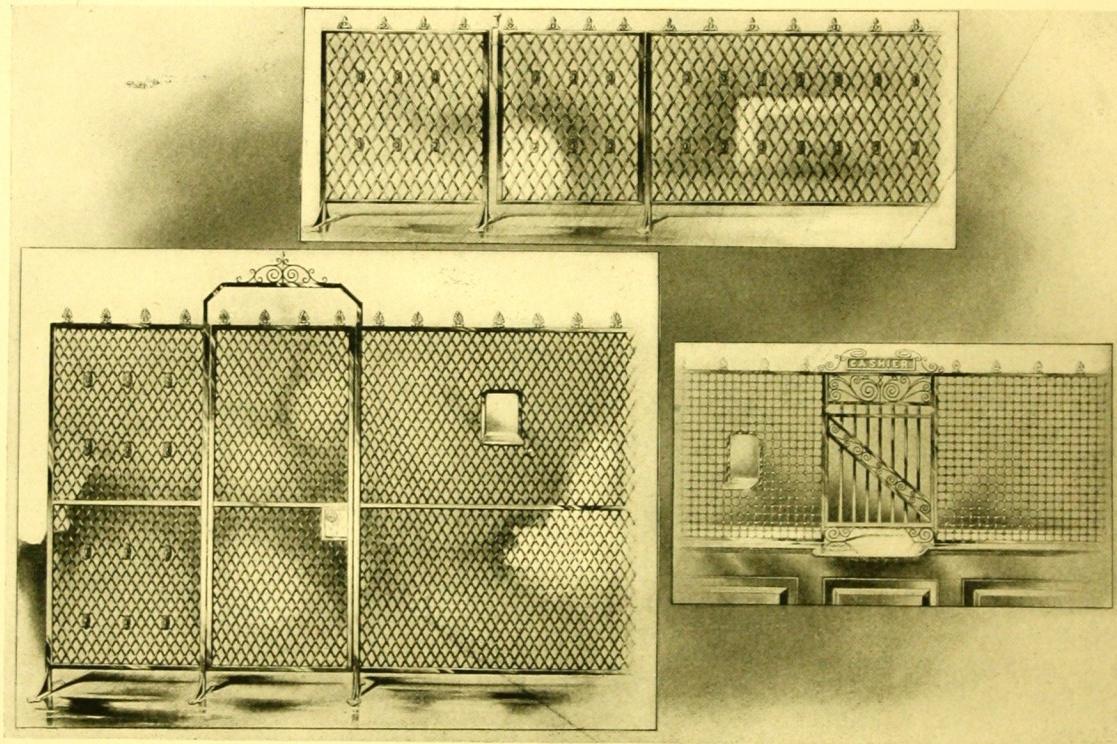

PLATE No. 5765.—WIRE WORK. We make a specialty of Wire Work for Banks, Offices and Factories.
Write for specifications and prices.

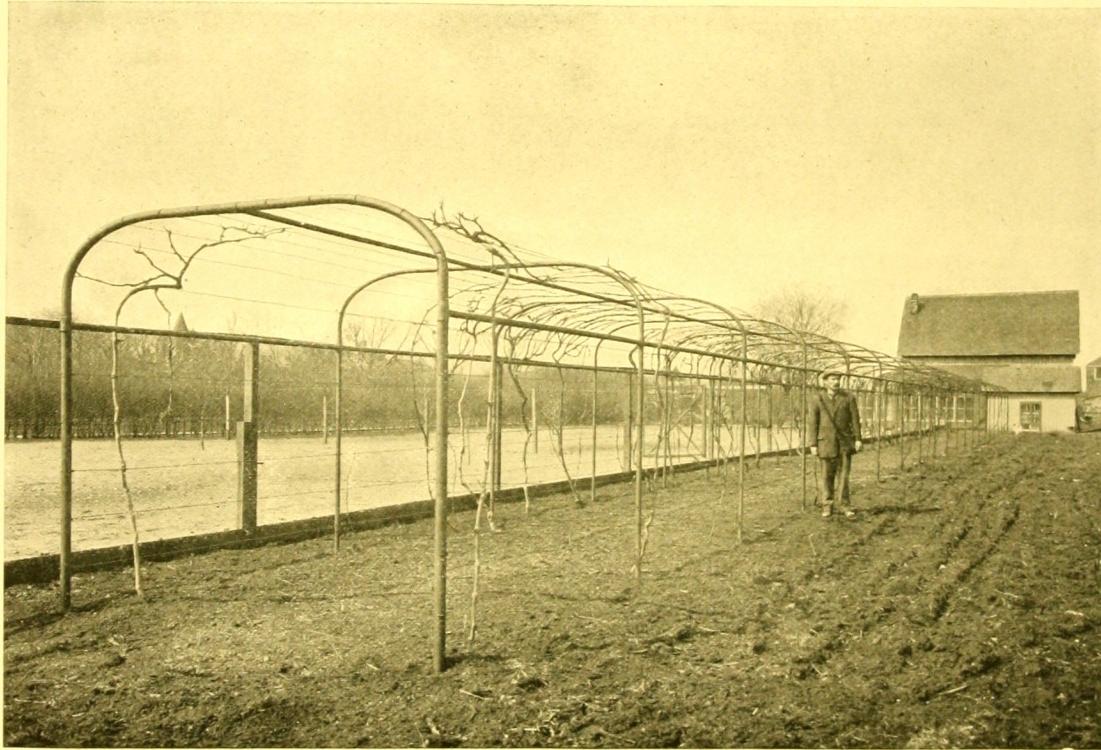

PLATE No. 5766.—PIPE AND WIRE GRAPE ARBOR two hundred and fifty feet long, erected on the property of
Charles A. Wimpfheimer, Esq., Long Branch, N. J. Write for specifications and prices.

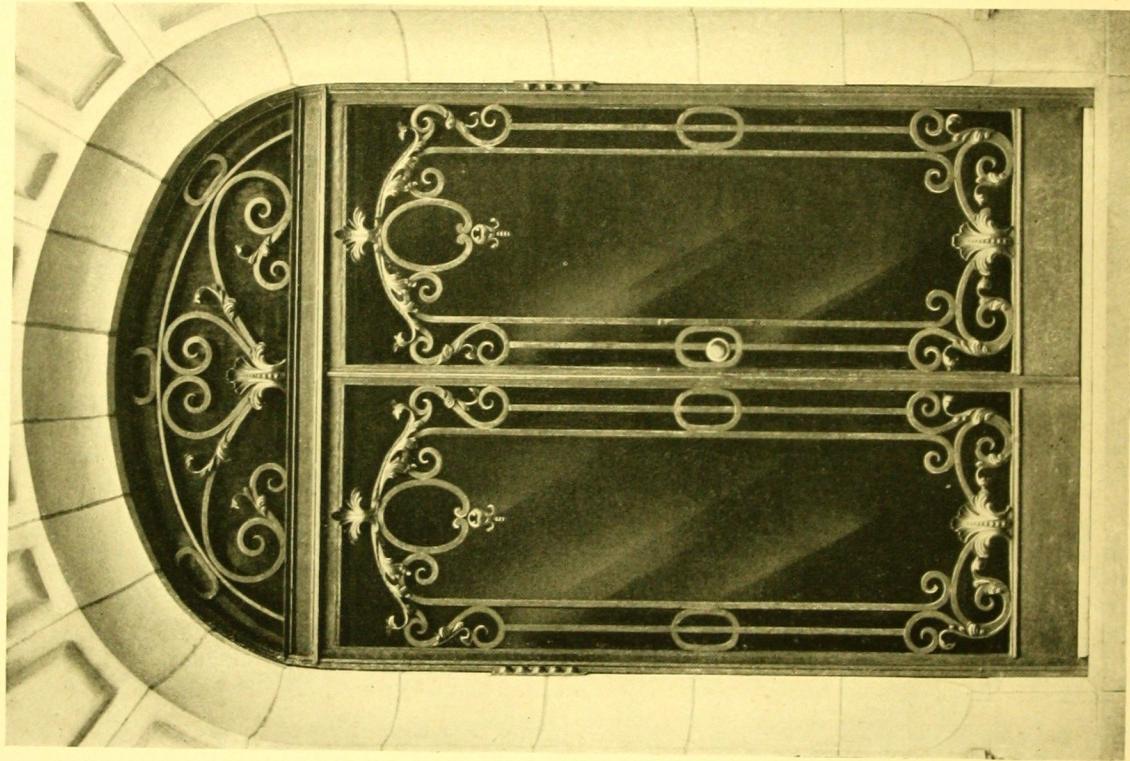

PLATE No. 5767.—**WROUGHT IRON DOOR.** We make a specialty of Wrought Iron Doors, Window Guards and general Ornamental Iron Work.
